

LOOK WHAT'S BACK!

Syphilis is making a comeback,

among gay and bisexual men.

Most men get syphilis from sucking, getting sucked, fucking, or getting fucked. Syphilis is serious – but if it's treated early it's curable.

Some men who have syphilis cannot tell they have it. Other men may have a sore or a rash on their body.

You can get a blood test for syphilis from your doctor, at a Sexual Health Clinic, or at Hassle Free Men's Clinic (416-922-0603).
